

## April 2017 Reflection.

The second part of March the children have become interested in Space and Planets in particular rocket ships. Blending this emerging interest with our S T E M Goal, (special awareness), the boxes were added and soon we had some rocket ships. The children enjoyed fitting their bodies into the Rocket ships that were planned and constructed as a group effort. The children enjoyed climbing in and out of the Rockets Space stories were included to support learning and exploration of Planets, Earth and the Universe. A space corner was created housing different sensory, visual, manipulative and imaginative play ideas.

Interest in caring for the dolls being sick and doctor play was still active so we moved the hospital for Dolls outdoors to make the most of the weather before winter. Hey De Ho, entertained us as usual fortnightly, bringing bunny ears and Easter fun Songs! Our Science and Sustainability with our gardening and watering vegetables continues with planting of some herbs into our raised garden box.
