

Reflections Koala Room August 2017

August and the Koalas are enjoying dress ups once again in the outdoors. Imaginations Early and role play are always popular with this age group.

The lightbox with magnetic shapes has also been popular with the children experimenting with force, (Magnetic pull).

The large outdoor blocks are exciting for the children because they have been building towers higher than themselves and sometimes the Educators! Squeals of delight can be heard as the Towers come crashing down scattering the blocks with a mighty sound. Mathematics are at play with halves and shapes.

The new Rope swing is a nice challenge with the children sharing ideas about how they might swing, this has been a challenge for some as they strengthen their upper body.

Ranger Michael from Roo Keepers excursions talked about some of his Native Australian animals. He shared his petting Zoo. The children all got to touch Lizards, snakes, an owl, a wallaby, a turtle and a Dingo.
