

Purple Group Reflection. Term 1. Week 6

Outcome 4: Children are confident and involved learners.

NQS 1: Educational program and practice

This week we learnt about the planet Neptune via our classroom character Sheshily who reports live from the Solar System via letters and packages. Sheshily advised that the Space Ship had blasted into Neptune – dissipating the particles of the planet into thin air and sending down just the core. We talked about actual properties of Neptune, facts and figures about it in a fun manner and most importantly how to rebuild it!

Instead of yoga this week we had an exercise program initiated by Jackson who wanted to have an exercise club called 'Exercisa'!

Cooking Neptune pancakes – the chocolate chips in the middle as the core of the planet!

Examining 'contents' of the icy planet Neptune and relay races – throwing the 'core' (beanbag) into Neptune (hoola hoop)!
