

Purple Group Reflection. Term 2. Week 5

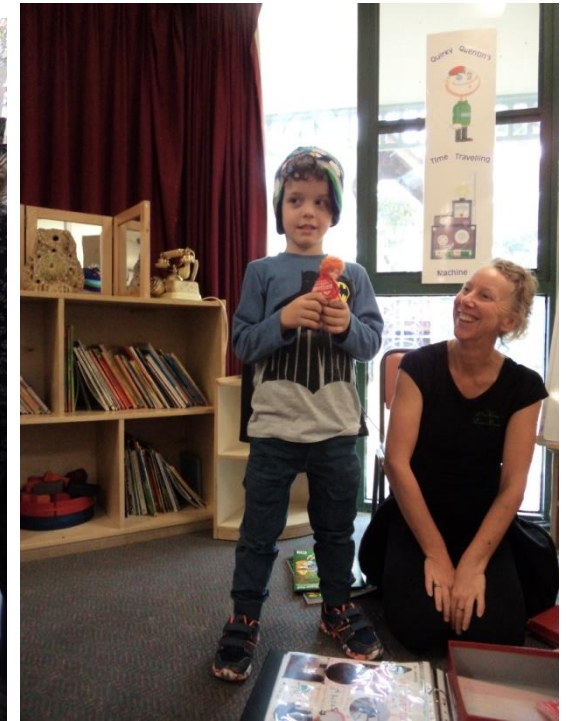

Outcome 4: Children are confident and involved learners.

NQS 1: Educational program and practice

Our young inventors in full swing designing their own unique and useful creations. They understand that an invention is a new/original idea never thought of until now and one that must be of use. We also discussed the importance of the invention plan process: think, write/design, create and then market.

From plan to product: designing our own Time Machine so we can visit the olden days and explore past inventions and have a sneak peek into the future – a bit like Quentin’s original Time Travelling Machine!

Above: Zac talking about his time with Sheshily!
