

# Purple Group Reflection. Term 2. Week 6

Outcome 4: Children are confident and involved learners.

NQS 1: Educational program and practice

Our young inventors this week have collaboratively designed/invented a **NO MORE MACHINE**. Any unwarranted items can be placed into the machine for disposal – this includes poor behaviour choices (written on paper)! There is an emergency button in case something was accidentally placed within the machine – say for example a child 😊! This machine then inevitably led to a **NO MORE TEACHER** – one that replaces the good old human one! This week children have also learnt about famous inventors: The Wright Brothers (aeroplane) and Bette Nesmith Graham (liquid paper)

**ABOVE:** Invention studio: planning on the computer and creating at the table!

**ABOVE:** We've loved having in our room student Laila who had to design/deliver an activity with the children as a part of her course to which she chose: THE TREASURE HUNT
