

Curriculum Reflection- Date: May 2024

The children were so excited to make presents for Mother's Day and did well with making necklaces and cards. The children's interests now are creative art, physical play such as dancing, jumping off the plank onto the large mat, bikes ball games and being a happy helper which involves helping with the clean-up routine such as wiping tables, sweeping the floor, collecting resources from around the centre, giving out and collecting lunch tags. We are working on calming our emotions with different strategies and using our words to convey messages to our peers and educators. The children are also enjoying learning new songs and taking turns to choose a song and sometimes having a go at singing a song. The children did enjoy going for a walk to collect natural resources so we plan on going for more walks and will put the route of our walk on the door for all to see.

Learning Outcome: **LEARNING OUTCOME 2: CHILDREN ARE CONNECTED WITH AND CONTRIBUTE TO THEIR WORLD** Children develop a sense of connectedness to groups and communities and an understanding of their reciprocal rights and responsibilities as active and informed citizens.

This is evident, for example, when children:

- Cooperate with others and negotiate roles and relationships in play episodes and group experiences.
- Take action to include and assist children to participate in social groups.
- Become aware of ways in which people are included or excluded from physical and social environments. Use play to investigate and explore nature and the natural environment
